

About us...

Coeden Fach is a community organisation initiated in February 2008.

We run a community tree nursery and offer training and practical aid in growing trees and perennial plants for both woodlands and food production.

We can supply trees for planting schemes, community projects and schools and can arrange a planting team on request.

Please note the address below is for correspondence only but we will be happy to arrange a visit for you to visit our tree nursery in Bishopston.

NB: Bare-rooted trees are only available from November to March as they must be planted in the dormant season! Trees in pots/planters may be purchased at any time.

Other plant species may be available - please contact us for information or advice about planting.

Our trees are organically grown to ensure healthy trees. We only use peat-free compost to help protect our environment.

Please note that hedgerow mix may contain some trees bought in from a local tree nursery.
